👤 PROFILE

Results-driven MIS & Operations Analyst with **10+ years of overall experience** (including 5+ years dedicated to MIS Reporting & Analytics) spanning BFSI Collections, Vendor Management, Billing Operations, Recovery Agency Operations, KPI Dashboards, and Business Process Automation.

Proficient Full Stack Web Developer with hands-on technical expertise designing and deploying production web applications, operational portals, RESTful APIs, and custom database solutions using the MERN Stack (React.js, Node.js, Express, MongoDB), PHP / Laravel, and MySQL / PostgreSQL.

Forward-thinking technologist actively integrating Generative AI, Prompt Engineering, ChatGPT, Microsoft Copilot, RAG concepts, and AI Agent Workflows into daily business operations to eliminate reporting friction and engineer intelligent automation solutions.

🧠 SKILLS

AI & Automation

Prompt Engineering, ChatGPT, Copilot, Claude & Gemini, n8n Workflow Automation, LLM Concepts, AI Agents, Vibe Coding, AI IDEs/Antigravity

Advance Excel

Advanced Formulas (XLOOKUP), Power Query, Dynamic Pivots & Slicers, Financial Modeling, Executive Dashboards, Macros / VBA

Frameworks & Libraries

React.js, Vite, Express.js, CodeIgniter, Laravel, RESTful APIs

Database

MySQL, PostgreSQL, MongoDB Atlas, Firebase, MS-Access

Tools & Cloud

Git & GitHub, Vercel, Postman, Hostinger, MS Office Suite, Construct 2, Photoshop, Oracle Cloud (OCI), Docker, Nginx, Jira & Miro

Languages

JavaScript (ES6+), Node.js, PHP, SQL, HTML5, CSS3

Domain Expertise + BI & MIS

BFSI Collections, Vendor Payout Governance, KPI Dashboards, Retail Operations, SLA Compliance, Data Reconciliation

Soft Skills

Cross-functional Team Leadership, Problem-Solving, Vendor Governance, Stakeholder Communication, Time Management

📜 CERTIFICATES

Fullstack Development Bootcamp - Javascript Upgrad - Knowledgehut

Intensive 6-month bootcamp covering React, Node.js, Express, MongoDB, RESTful API architecture, and modern full-stack development best practices.

AI Mastermind Certification- Outskill

Comprehensive certification on Generative AI, Prompt Engineering, LLM applications, workflow automation, and AI productivity integration.

PHP & MySQL Web Development-Micans Infotech

Hands-on technical certification covering dynamic PHP scripting, relational MySQL database management, CRUD operations, and session handling.

AI Essentials Learning Path-Elevate

Core foundation in artificial intelligence paradigms, machine learning concepts, and organizational AI adoption strategies.

PROFESSIONAL EXPERIENCE

Datamatics Global Service Ltd, MIS Executive

- Processed ₹200+ Cr monthly payouts for 1000+ agencies; ensured 99% billing accuracy.
- Managed payroll for 700+ agents, meeting all payment deadlines.
- Resolved client queries within 24 hrs; expedited payments, reducing processing time by 20%.

Puducherry, India

Firstsource Solutions Limited, CSA

- Involved in Non voice BPO (Health Care) activities.
- Processed 500+ Healthcare claims per day.

Sep 2014 – Mar 2015
Puducherry, India

EDUCATION

Bachelor's Degree in (Computer Science), RAAK Arts and Science College

Puducherry, India

AWARDS

Star Performer Award, Datamatics Global Services Ltd

Quality Champion, Firstsource Solutions Ltd

Wow Customer Caller, Intelenet Global Services Pvt Ltd

INTERESTS

Generative AI Motion & Video Production, Multimodal Storyboarding, 2D HTML5 Canvas Game Development (Construct 2), Fintech Analytics & Financial Modeling, Editorial Magazine Layouts & Publication Typography, Rapid Prototyping with Modern AI IDEs, Technical Blogging & Developer Documentation

PROJECTS

1. ScripVault – Personalized Investment Portfolio Tracker

Description: Developed a full-stack, user-centric web application providing personalized stock market and mutual fund advisory, investment tracking, and portfolio management capabilities. Inspired by platforms like Scripbox and Groww, ScripVault aims to empower users with goal-oriented investment tools and real-time market insights.

Technology Stack: React.js (Frontend), Node.js/Express.js (Backend), MongoDB Atlas (Database), JavaScript, HTML, CSS, RESTful APIs.

Key Contributions & Features:

- Engineered a secure Node.js/Express.js API with user authentication and integrated third-party APIs for real-time market data.
- Built an intuitive React.js frontend for dynamic dashboards and portfolios, including "Watchlist" and "Ask Experts" features.
- Developed a full-stack investment tracking application, ensuring comprehensive documentation and successful cloud deployment.

2. DM-Ispark – Internal Project Management System

Description: Developed an internal, web-based project management system designed to streamline task coordination, login tracking, and productivity oversight across departments. Tailored for operational teams and administrators, it centralizes project workflows, employee time logs, and real-time task tracking.

Technology Stack: MySQL, CodeIgniter 3, PHP, HTML, CSS, Bootstrap.

Key Contributions & Features:

- Built a comprehensive admin dashboard for project management, assignment, and real-time progress monitoring.
- Implemented robust employee login and task tracking modules with accurate duration capture, and developed Excel import functionality for data efficiency.
- Designed a responsive UI using Bootstrap and structured a scalable backend with role-based access control.

3. Powerbooks - Cloud Accounting & Billing System

Description: Developed a cloud-based accounting and billing software designed to streamline financial processes for Small and Medium Enterprises (SMEs). This platform simplifies invoicing, inventory management, and performance tracking.

Technology Stack: MySQL, CodeIgniter, PHP, HTML, CSS.

Key Contributions & Features:

- Engineered backend logic for automated proforma invoice and bill generation, improving efficiency for staff and managers.
- Implemented an administrative dashboard for real-time performance tracking and developed inventory management functionalities.
- Designed a robust database schema and collaborated on developing an intuitive front-end user interface.

4. Orbita – Productivity & Work Management Platform

Description: Developed a full-stack, centralized productivity and work management platform designed to streamline team execution, sprint planning, and daily operational workflows. Engineered with multi-view task tracking, deep-focus timers, and strategic priority matrices to eliminate operational friction and elevate team delivery velocity.

Technology Stack: React.js, Vite, Node.js, Express.js, MongoDB, JavaScript (ES6+), RESTful APIs, HTML5, CSS3.

Key Contributions & Features:

- Engineered dynamic multi-view task workflows including interactive Kanban Flow Boards, Calendar Planners, and an Eisenhower 2x2 Priority Matrix for strategic task triage.
- Developed an integrated Focus Timer and real-time task time tracking engine with automated productivity score computation, milestone badges, and duration analytics.
- Designed a high-performance, modern UI using React, Vite, and TailwindCSS with centralized workspace management, role-based permissions, and sub-second reactive state synchronization.
